

Moving Forward

Daniel Chuhta, Assistant Superintendent

M.S.A.D. No. 75

School Year 2015-2016

A few things going on in the district...

Community Connections
Next Generation Science Standards
Proficiency-based Learning
Suicide Awareness
RTI
Improving Attendance
Learning Commons
Marzano Framework
Common Core
PEPG
Teachers College Reading and Writing Project
New Elementary Mathematics Program
MTA Project
Emergency Preparedness

Goal: Increase student achievement

- A vision
- A plan
- Training
- Coaching
- Cheering

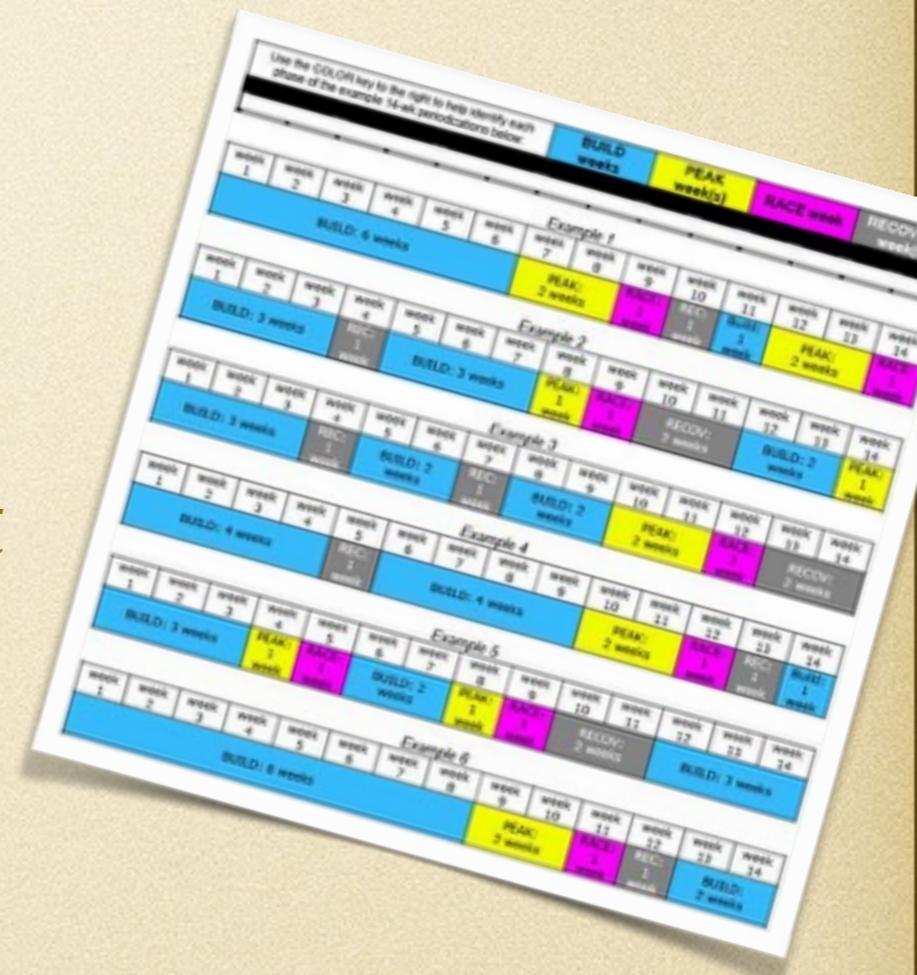

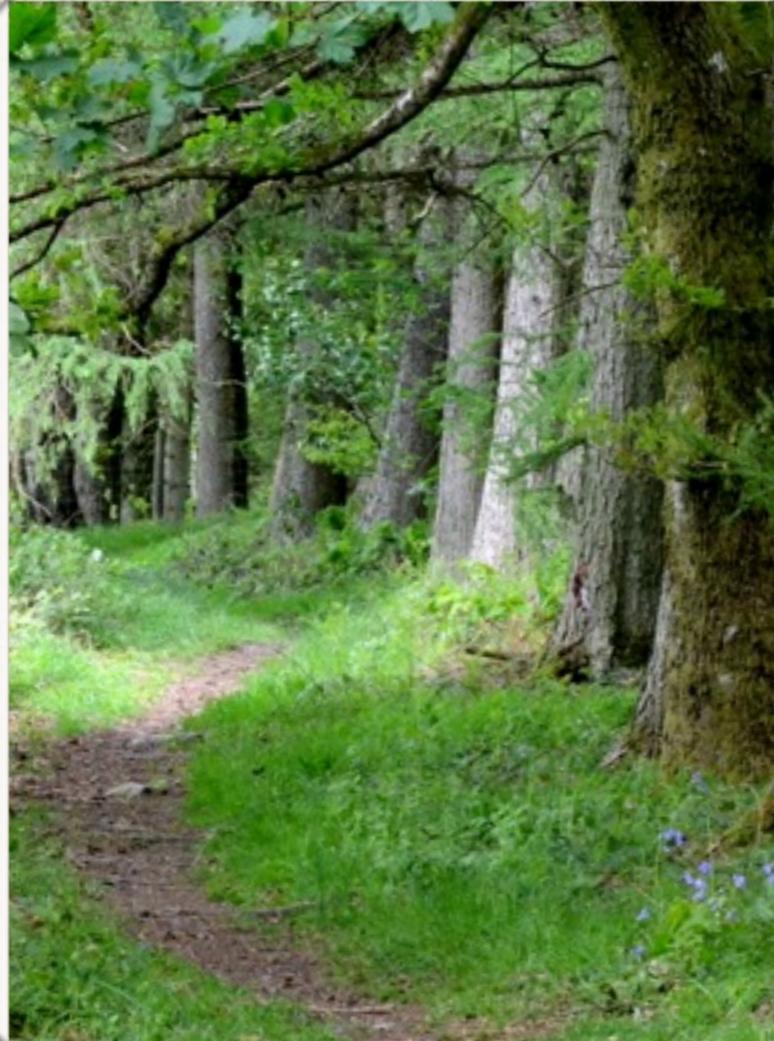

What's our vision?

- All students will be better prepared for college, career, and civic readiness
- All students will connect to, engage in, and develop a passion for learning
- All students can learn and show what they know in a variety of ways and paces (multiple pathways)
- Students, teachers, and families have a clear understanding of where a student's learning is, and where it is headed

What's our plan?

- Learn it together, learn it on your own (Empower)
- Practice it together, practice it on your own (Expectations)
- Involve your students, their parents and the community (Attendance)

“Distance changes utterly when you take the world on foot. A mile becomes a long way, two miles literally considerable, ten miles whopping, fifty miles at the very limits of conception. The world, you realize, is enormous in a way that only you and a small community of fellow hikers know. Planetary scale is your little secret.”

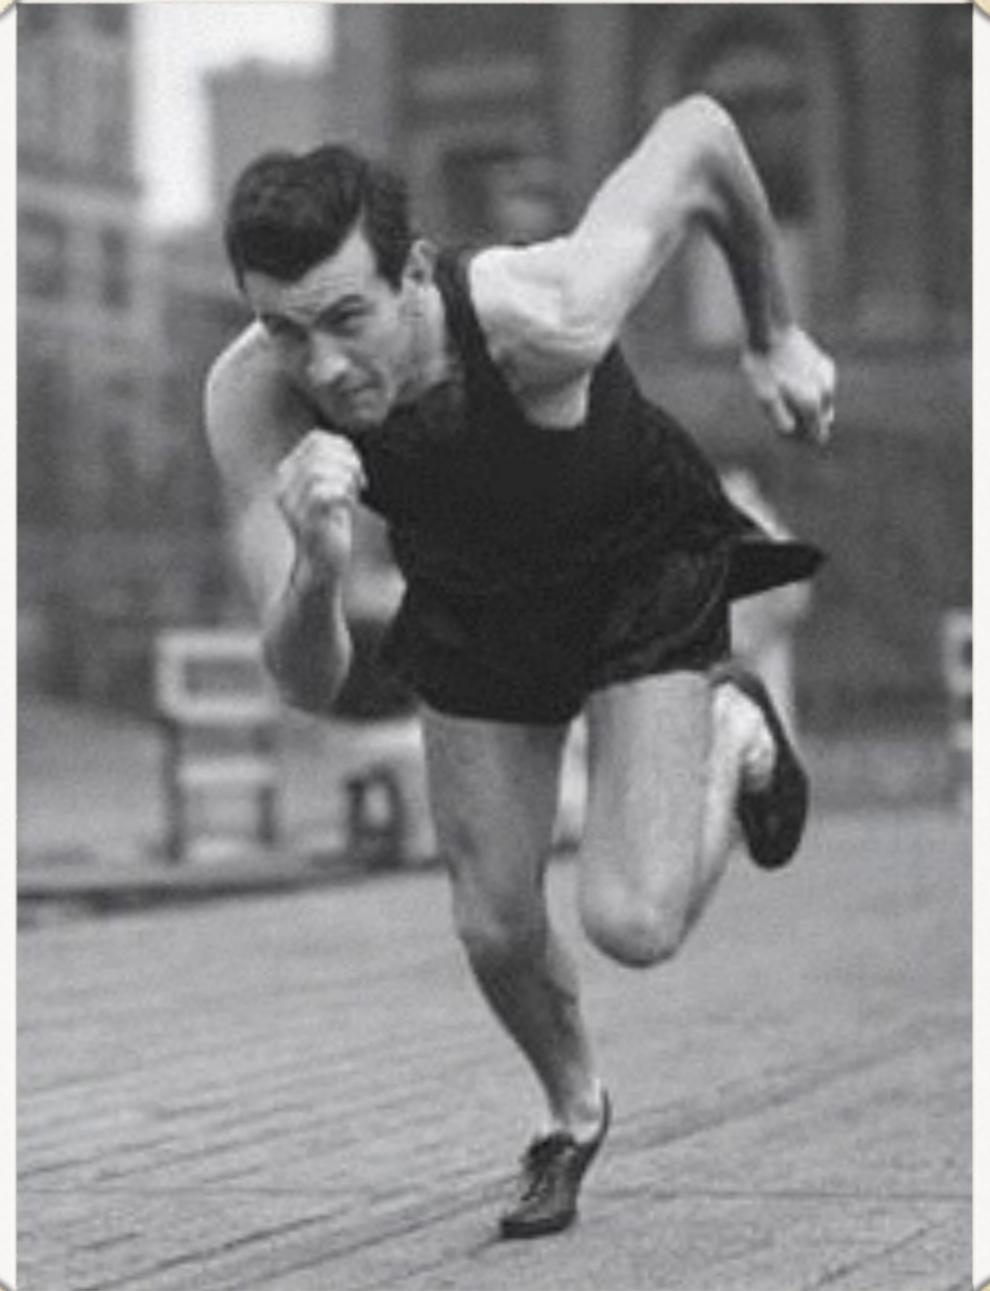

Bill Bryson

Training in Progress

- We can model being learners
- We can model perseverance
- We can model communication, problem solving, involvement and thinking...*like grading!*

“To persevere,
I think, is
important for
everybody.
Don't give up,
don't give in.
There's always
an answer to
everything.”
Louis Zamperini

Hey coach!

- The many faces of coaches
 - Those who come to us
 - Those among us
 - Those in the mirror

Cheer 'em on!

RIGHT on Hereford St., LEFT on Boylston St.

Barclay Oudersluys, 23, is raising money for charity by re-creating the transcontinental jog taken by the fictional Forrest Gump.

“Since early May, Oudersluys, 23, has been running across the United States, in scorching heat and through rain and wind, logging more than 30 miles per day.”

“Called “project Gump” after the iconic cross-country run depicted in the 1994 Tom Hanks classic “Forrest Gump,” Oudersluys has used the herculean effort to raise \$10,225, so far, to drill a well in Africa.”

Barclay Oudersluys, 23, is raising money for charity by re-creating the transcontinental jog taken by the fictional Forrest Gump.

“So with five pairs of running shoes and a whole lot of confidence, Oudersluys set off from the Santa Monica pier May 9.”

“When he completes his journey Saturday (August 15) at the Marshall Point Light House in Port Clyde, he will have covered about 3,150 miles in 100 days.”

“I think it’s all mental,” he said. “It’s just, do you want to do it and stay focused and put the work in?”

Barclay Oudersluys, 23, is raising money for charity by re-creating the transcontinental jog taken by the fictional Forrest Gump.

“Each day he rises about 5:30 a.m. and hits the road by about 6 a.m., finishing his 30 or more miles by about 1 p.m., he said.”

“To keep up the pace, he must eat about 4,000 to 5,000 calories each day, he said.”

“Helping him along the way have been countless people who have given him places to stay, arrangements that were often cobbled together a day or two before he would arrive in someone’s town.”

Barclay Oudersluys, 23, is raising money for charity by re-creating the transcontinental jog taken by the fictional Forrest Gump.

“Oudersluys, who earned his master’s degree in nuclear engineering from the University of Michigan in May, said that once he reaches Port Clyde, he will traverse the country again – behind the wheel, returning to California, where he will start law school next week at the University of California Berkeley.”

“Asked why he chose to study law, his answer would make Forrest Gump proud.”

“I don’t know, it just seemed like a good thing to do, I guess,” he said.”

Ask ME why we should choose to make our education system even better?

“I don’t know, it just seems like the RIGHT thing to do!”
